## Editorial—

The Department of Political Science is one of the oldest departments of Sipajhar College which opened Major in 1985-86. As the first work, the Department could be able to make a great endeavour to publish this journal named *IDEAS: A Journal of Multidisciplinary Thoughts* in annual frequency. The Journal is expected to focus on different ideas and concept of the political events concerning primarily with different aspects of the society. It carries out analytical views on several facts regarding principles of Government as well as the new ideas incorporative the matters-political and non-political; governmental and non-governmental and thus resolves to come forward for action, reaction and interaction.

### Make in India Vs. Made in India

The policy of Make-in-India was propounded by the Prime Minister of India, Narendra Modi who has been able to spread his notion and ideas throughout the country and abroad. He seems to practice his spiritual knowledge through various innovative plans and policies and thus established his glorious image among the people of different nations. He makes a shout on his specific policy which is considered much essential for the up-liftment of the people as well as the nation. One of his policies is Make-in-India through which Mr. Modi wants to speak of a great endeavour to build India. He wants everything to make in India on one hand and make India on the other simultaneously. Here, Make-in-India known as *Bharat Nirman* is usually preceded by Made-in-India, the motto of the former is that the Indians should make their respective things to build India and establish it in the periphery of international field. India should be made a manufacturing focal point which itself is surrounded by markets replete with its own products. This programme transforms India into a business core investing men and materials which will definitely result in the economic growth and development. It is expected to strengthen India's manufacturing sector which provides for job opportunity resulting in alleviation of poverty.

The Make-in-India programme ultimately turns itself into the Made-in-India which etymologically indicates to the unitary system of India. There is a fedro-unitary system in India. In other words, India has got both federal and unitary features. As India is multilingual, multi-religious, and multi-racial, her people must be fastened by the bond of unity. Hence, in order to strengthen the bond of different ethnic people, the framers of the constitution of India provides for some unitary features which are mostly relevant to Made-in-India. It unites all irrespective of caste, creed, religion etc. Constitutionally it is a union of states, so whatever is manufactured or made in wherever within India, the product must be marked as the common words: Made-in-India. There is unity and integrity behind the term-Made-in-India. India claims any products made herein to be Indian. So Make-in-India programme is vice-versa with the Made-in-India.
