✓ मानक आन्तरिक रेखांकन मिटर एवं सेन्टीमीटर द्वारा किया जाता है। मानक रेखांकन मिटर एवं सेन्टीमीटर द्वारा किया जाता है।

The above list is not exhaustive. It is only a list of the most common types of business enterprises in the country.

1. What is the difference between a function and a procedure?
 A function is a block of organized, reusable code that is used to perform a single, action. A function is generally created to perform a single, action, and can only be used once. However, the code for a function is only written once, and the code can be used many times.
 A procedure is a block of organized, reusable code that is used to perform a single, action. A procedure is generally created to perform a single, action, and can only be used once. However, the code for a procedure is only written once, and the code can be used many times.
