

Talk delivered at Sipajhar College

MANGALDAI, Aug 29: A special talk on 'Nurturing the Next Generation of Students/ Researchers' was presented on Thursday at Sipajhar College under the joint initiative of the Institution's Innovation Council (IIC) and the Internal Quality Assurance Cell (IQAC). The primary objectives of the programme were to provide students with guidance and insights into higher education, research, and future career opportunities. Dr Shubhankar Sharma, currently associated with the Max Planck-University of Helsinki Center for Social Inequalities in Population Health, University of Helsinki, Finland, as a postdoctoral researcher, attended as the resource person.

selection. He particularly encouraged students to identify their interests and abilities, set clear goals, develop a research interest, and make effective use of academic opportunities available at the international level.

The programme, anchored by Dr Nirmali Chakraborty, librarian, Sipajhar College, saw Dr Satyendra Kumar Sarmah, principal, Sipajhar College, delivering the welcome address. In his address, the principal urged students to go beyond the boundaries of conventional education and develop a habit of acquiring new knowledge, research-oriented thinking, and an innovative outlook. He emphasised the need for students to develop their skills, interests, and potential in the right direction in today's highly competitive world.

Students from both the Arts and Science streams participated in the lecture programme. The programme provided students with an important opportunity to gain practical insights and guidance regarding new areas of thought, research possibilities, and future career prospects. – Correspondent
